SKILLS

Javascript, Ember.js, Ruby, Ruby on Rails, SQL, postgresSQL, AWS, Handlebars, Git/Github, Node.js, Express.js, MongoDB, Mongoose, jQuery, AJAX, HTML5, CSS, SCSS

EXPERIENCE

General Assembly · Web Development Immersive Student
Boston, MA

Aug 2017 to Nov 2017

Enrolled in General Assembly's 12 week, 600+ hour Web Development Immersive program for full stack web development. Built front end and full stack applications using technologies like HTML5, SCSS, Bootstrap, Javascript, jQuery, AJAX, Ruby, Rails, PostgreSQL, third party API integration and more.

Projects:

- Tic-Tac-Toe: A front-end app for playing the classic game Tic-Tac-Toe, built with HTML, CSS, Javascript, and jQuery
<https://deejay94.github.io/ttt-game-project1/>
- My Favorite Movies: A full-stack app allowing users to add their favorite movies, the genre, and a comment to a list. Users are also able to edit and delete information. Front-end built with HTML, jQuery, Handlebars, SCSS, and Javascript. Back-end built with Ruby on Rails and SQL.
<https://deejay94.github.io/favorite-movies/>
- Sserpdrow: A content management system, similar to Wordpress, that allows users to create, read, edit, and delete blogs. Front-end built with HTML, CSS, Javascript, and Handlebars. Back-end built with Express, MongoDB, and Mongoose.
<https://d0minators.github.io/CMS/>
- Budget-Tracker: A full-stack app where users can keep track of their budget. They input their budget goal and their actual budget, then the app displays how much they are over or under their budget. Front-end built with Ember, Javascript, HTML, and SCSS. Back-end built with Ruby on Rails.
